# Cub Creek Science Camp

## August/September 2010

### Kanga & Roo

The two baby Bennet Wallabies that our campers helped bottle raise this summer have really grown. The picture below was taken just before the summer sessions started.

### Now look at them!

### End of the summer Goodbyes

It is always hard to say the last goodbyes to the staff and campers that we have shared such special times with. Here at Cub Creek we become part of a larger family and those memories and ties will stay with us forever. So once again, we look down the road waving goodbye as the last car pulls out and can say with a thankful heart, "It has been a great summer." Thanks to all the parents who shared their children with us. Without you we would not be here.

SEE YOU NEXT YEAR!

### Gizmo

Gizmo is a ringtailed lemur that was born here at the ranch about 6 weeks ago. He loves to have his head rubbed and makes purring noises along with little squeaks.

### Fun Animal Fact for the month.

The Lynx has excellent eyesight and can spot a mouse 250 feet away.

Watch out mice in the Barn. Jazz (our new baby lynx) just might catch you.

It is not too early to register. Check out our "Price Freeze". Up until Sept. 30<sup>th</sup> you can register for summer 2011 and only pay 2010 prices. After the 30<sup>th</sup> the price will go up to \$795 per week. Register online or call the office at 573-458-2125.
